

Sprint 4 Plan

Product: Decentralized Internet

Team: The Distributors

Sprint end: 06/06

Revision: 1

Date: 05/22

Goal:

Give users control over how the data is distributed over the network.

Tasks:

1. As a user I want to choose whether I want to create or join a preexisting network
 - 1.1. Create UI for admin page with the option to create or join a network
 2. As a user I want to control the storage requirements of my network
 - 2.1. Get data sharding across nodes
 3. As a user I want to be able to upload files to the network
 - 3.1. Create file upload functionality
 4. As a user I want to rely on secure authentication
 - 4.1. Implement authentication with a decentralized identity solution
 5. Implement testing framework for backend
 6. Implement testing framework for frontend
-

Team Roles:

Product Owner: Artie

Scrum Master: Pav

Engineers: Ronan, Ray, Ivan

Task Assignment:
