

Sprint 3 Plan

Product: Decentralized Internet

Team: The Distributors

Sprint end: 05/23

Revision: 1

Date: 05/09

Goal:

We want to provide configurability for network admins and catch up on backlog from sprint 2

Tasks:

1. Design an interface for files on the network. Store files. [3]
 2. Test suit for the initial KVS store [5]
 3. Implement links between files [2]
 4. Admin UI page [5]
 5. Shard data across nodes [12]
 6. Research flask account implementations [5]
 7. Test name server for instantiating peer to peer connections[4]
 8. Implement UI for dynamically changing network size [3]
-

Team Roles:

Product Owner: Artie

Scrum Master: Ray

Engineers: Pav, Ronan, Ivan

Task Assignment:
