

## Sprint 2 Plan

---

**Product:** Decentralized Internet

**Team:** The Distributors

**Sprint end:** 05/09

**Revision:** 1

**Date:** 04/25

---

### **Goal:**

Make our network store files and provide a UI for these files to be uploaded and downloaded.

---

### **Tasks:**

1. Design an interface for files on the network. Store files. [3]
  2. Create UI for displaying the documents currently on the network [2]
  3. Create UI for finding documents on the network [3]
  4. Create caching protocol to start saving documents to disk [7]
  5. Create Web page for making/editing documents [5]
  6. Test suit for the initial KVS store [5]
  7. Implement links between files [2]
  8. Implement gossip protocol so network is eventually consistent [3]
  9. Research peer to peer solutions[4]
- 

### **Team Roles:**

**Product Owner:** Artie

**Scrum Master:** Ronan

**Engineers:** Pav, Ray, Ivan

---

### **Task Assignment:**

**Artie:** 1, 4

**Ivan:** 3, 6

**Ronan:** 7, 8

**Pav:** 2, 5

**Ray:** 9

---

### **Scrum Times:**

1. Tuesday 2:40 pm

2. Wednesday 6:00 pm
3. Sunday 12:00 pm

---
